To whom it may concern:

We would like to take a moment to thank the staff of Beton Montana Ltd for their outstanding work on the delivery of inert granular materials to our building site in Montana, Bulgaria. Building a clarification plant is a huge challenge. Nevertheless Mr. Milen Nikolov and the rest of his crew were always ahead of the game and managed to complete their work on time.

In conclusion, we would highly recommend Beton Montana Ltd. If their performance is any indication, they will be a positive addition to any project.

Sincerely,

  
Gerhard Ableitinger
